New in AutoCAD LT 2024

Smart Blocks: Placement

Smart blocks placement lets you automatically place blocks in your drawing based on where you've inserted the same ones thus far in your DWG file, reducing the number of clicks and saving you time in the process.

AutoLISP

Use AutoLISP to streamline workflows and enforce CAD standards through automation. Leverage thousands of previously written programs created for use in AutoCAD-based programs. Supports file types LSP, FAS, and VLX.

Recent AutoCAD LT features

Trace

Add design change notes and markups to safely review and add feedback directly to a DWG file without altering the existing drawing.

Count

Automate the counting of blocks or objects within a selected area or throughout your entire drawing with a menu to identify errors and navigate through your counted objects.

Share

Send a controlled copy of your drawing to teammates and colleagues to access wherever they are.

Push to Autodesk Docs

Push your CAD drawing sheets as PDFs to Autodesk Docs from AutoCAD.

Floating windows

Pull away drawing windows to display multiple drawings side by side or on separate monitors without opening another instance of AutoCAD LT. Each window is fully functional for viewing or editing.
